

Construction Phase Services

With increased attention on the impact of construction sites on the public as well as rapidly increasing material and labor costs, the importance of effective construction phase services has never been greater. A poorly managed construction site can result in environmental impacts, fines, negative publicity, increased costs and lengthy delays.

Gewalt Hamilton Associates, Inc. field technicians work closely with municipalities, residents, business owners and contractors to help keep projects on time, within budget and phased in a manner to create the least amount of disruption to daily operations.

Our construction phase services are provided by licensed professional engineers, degreed professionals and technicians with a wealth of experience in all types of public and private site construction.

IL Route 22 Watermain, Lincolnshire, IL
